

# Module 8: How to overlay old maps

---

1. Find an old map and convert it to image format if needed.
2. Crop the map to make it easier to overlay.
3. Download and install Google Earth
4. Add map overlay and align old map onto the new one.
5. Add placemarks for spots you'd like to detect.
6. Use the GPS coordinates from Google Earth and put them into a gps unit to go straight to the location. You can also use routing or trip planning to hit multiple spots.
